

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of the claims in the application:

Listing of Claims:

1. – 10. (cancelled)

11. (new) A cleansing article, wherein the cleansing article comprises a textile that is impregnated with a preparation comprising:

(a) from 1 % to 30 % by weight of one or more anionic surfactants; and

(b) at least 8 % by weight of one or more lipids which are liquid or viscous at room temperature,

each based on a total weight of the preparation.

12. (new) The article of claim 11, wherein the preparation comprises at least 20 % by weight of (b).

13. (new) The article of claim 12, wherein the preparation comprises from 2 % to 25 % by weight of (a).

14. (new) The article of claim 11, wherein (b) comprises one or more of mineral oil, C₁₂₋₁₅ alkyl benzoate, octyldodecanol, soybean oil and cetyl palmitate.

15. (new) The article of claim 11, wherein (a) comprises one or more of sodium myreth sulfate, sodium laureth sulfate, monoisopropanolamine laureth sulfate, sodium acyl glutamate, sodium lauroyl sarcosinate, sodium methyl cocoyl taurate and dioctyl sodium sulfosuccinate.

16. (new) The article of claim 11, wherein the textile comprises a nonwoven fabric.

17. (new) The article of claim 11, wherein the textile comprises a wipe.

18. (new) The article of claim 11, wherein the textile comprises from 0 % to 30 % by weight of cotton fibers, from 10 % to 80 % by weight of viscose fibers and from 20 % to 90 % by weight of polyester, each based on a total weight of the textile.

19. (new) The article of claim 11, wherein the textile has a degree of impregnation of from 100 % to 1000 %.

20. (new) The article of claim 11, wherein the article comprises a textile that is impregnated with a preparation comprising:

(a) from 2 % to 25 % by weight of one or more anionic surfactants which comprise one or more of sodium myreth sulfate, sodium laureth sulfate, monoisopropanolamine laureth sulfate, sodium acyl glutamate, sodium lauroyl sarcosinate, sodium methyl cocoyl taurate and dioctyl sodium sulfosuccinate; and

(b) at least 20 % by weight of one or more lipids which are liquid or viscous at room temperature and comprise one or more of mineral oil, C₁₂₋₁₅ alkyl benzoate, octyldodecanol, soybean oil and cetyl palmitate, each based on a total weight of the preparation.

21. (new) The article of claim 20, wherein the textile comprises a nonwoven fabric.

22. (new) The article of claim 21, wherein the textile comprises a wipe.

23. (new) The article of claim 22, wherein the textile comprises from 0 % to 30 % by weight of cotton fibers, from 10 % to 80 % by weight of viscose fibers and from 20 % to 90 % by weight of polyester, each based on a total weight of the textile.

24. (new) A process for producing a cleansing article, wherein the process comprises an impregnation of a textile with a preparation comprising

(a) from 1 % to 30 % by weight of one or more anionic surfactants; and

(b) at least 8 % by weight of one or more lipids which are liquid or viscous at room temperature,

each based on a total weight of the preparation.

25. (new) The process of claim 24, wherein the impregnation comprises at least one of immersion of the textile in a dip bath, spraying the textile with the preparation and wiping the textile on doctor blades, doctor bars, or doctor nozzles which discharge the preparation.

26. (new) The process of claim 25, wherein the preparation comprises from 2 % to 25 % by weight of (a) and at least 20 % by weight of (b).

27. (new) The process of claim 26, wherein (a) comprises one or more of sodium myreth sulfate, sodium laureth sulfate, monoisopropanolamine laureth sulfate, sodium acyl glutamate, sodium lauroyl sarcosinate, sodium methyl cocoyl taurate and dioctyl sodium sulfosuccinate and (b) comprises one or more of mineral oil, C₁₂₋₁₅ alkyl benzoate, octyldodecanol, soybean oil and cetyl palmitate.

28. (new) The process of claim 25, wherein the textile comprises a nonwoven fabric.

29. (new) The process of claim 28, wherein the textile comprises from 0 % to 30 % by weight of cotton fibers, from 10 % to 80 % by weight of viscose fibers and from 20 % to 90 % by weight of polyester, each based on a total weight of the textile.

30. (new) The process of claim 29, wherein the textile has a degree of impregnation of from 100 % to 1000 %.

31. (new) A method of producing cleansing wipes, wherein the method comprises impregnating a textile with a preparation which comprises

(a) from 1 % to 30 % by weight of one or more anionic surfactants; and

(b) at least 8 % by weight of one or more lipids which are liquid or viscous at room temperature,

each based on a total weight of the preparation,

and wherein the wipes foam upon application to the skin and refat the skin with lipids.
